

What is the name of the following chemical?

iron(II)perchlorate

What is the name of the following chemical?
KF

potassium fluoride

What is the name of the following chemical?
 HClO_2

chlorous acid

What is the name of the following chemical?
 Na_2CO_3

sodium carbonate

What is the name of the following chemical?

nickel(II)oxide

What is the name of the following chemical?

boron trifluoride

What is the name of the following chemical?

magnesium
phosphate

What is the name of the following chemical?

HCl

hydrochloric acid

What is the name of the following chemical?

calcium bromide

What is the name of the following chemical?

carbon dioxide

What is the name of the following chemical?

lead(IV)nitrate

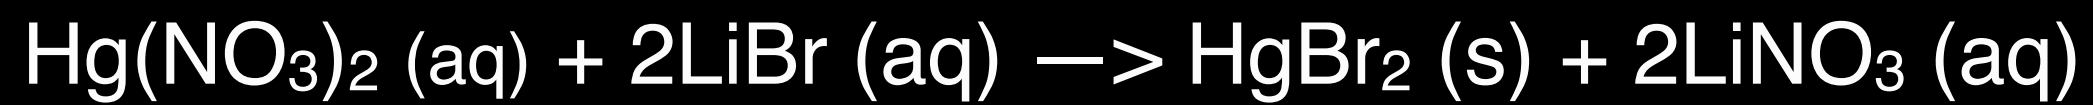

What is the name of the following chemical?

sodium hydroxide

Can you write a balanced equation for the following statement?

A solution of mercury(II)nitrate is combined with a solution of lithium bromide. This combination results in a precipitate of solid mercury(II)bromide and a solution of lithium nitrate.

What is the name of the following chemical?

aluminum
hydrogensulfate

What is the name of the following chemical?

HI

hydroiodic acid

What is the name of the following chemical?

nitrous acid

What is the name of the following chemical?

copper(II)nitride

What is the name of the following chemical?

carbon tetrabromide

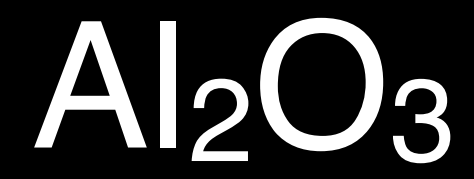

What is the name of the following chemical?
 HBr

hydrobromic acid

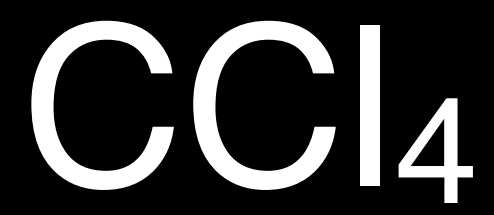

What is the formula for the following chemical?
silver sulfide

What is the formula for the following chemical?
aluminum oxide

What is the formula for the following chemical?
carbon tetrachloride

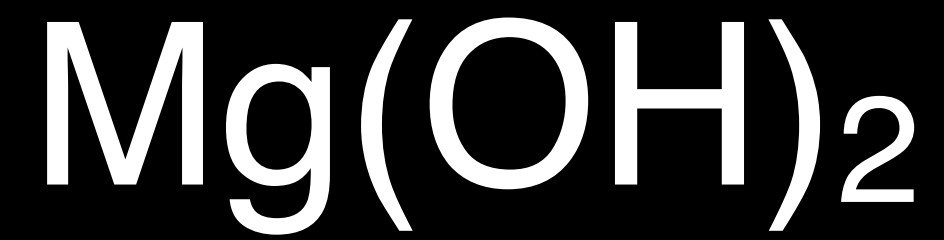

What is the formula for the following chemical?
lead(II)sulfite

What is the formula for the following chemical?
lithium iodide

Lil

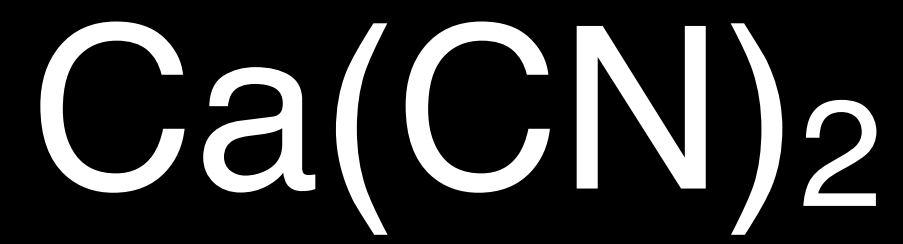

What is the formula for the following chemical?
magnesium hydroxide

What is the formula for the following chemical?
potassium sulfide

What is the formula for the following chemical?
calcium cyanide

What is the formula for the following chemical?
iron(II)phosphate

What is the formula for the following chemical?
dinitrogen pentoxide

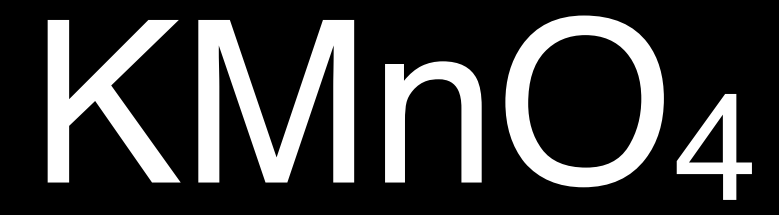

What is the formula for the following chemical?
bromous acid

What is the formula for the following chemical?
hydrofluoric acid

HF

What is the formula for the following chemical?
potassium permanganate

What is the formula for the following chemical?
oxygen difluoride

What is the formula for the following chemical?
carbon monoxide

CO

What is the formula for the following chemical?
aluminum nitrite

What is the formula for the following chemical?
iron(II)oxide

FeO

What is the formula for the following chemical?
beryllium phosphide

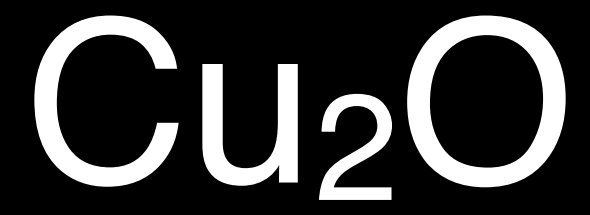

What is the formula for the following chemical?
calcium hydrogenphosphate

What is the formula for the following chemical?
aluminum sulfide

What is the formula for the following chemical?
copper(I)oxide

What is the formula for the following chemical?
dibromine heptoxide

What is the formula for the following chemical?
tin(IV)chloride

What is the formula for the following chemical?
copper(II)sulfate pentahydrate

What is the formula for the following chemical?
nitrogen trihydride (ammonia)

NH_3

What is the formula for the following chemical?
potassium oxalate

What is the formula for the following chemical?
magnesium sulfate octahydrate

What is the formula for the following chemical?
cobalt(III)thiocyanate
